

Fadi Badarni

Software Engineering Undergraduate

A software engineering undergraduate with a huge passion for learning, a good team player and a self-motivated person.

Always on the look for new challenges and acquiring useful skills to help boost my knowledge in different aspects of the field, determination and hard work are key aspects in defining who i am.

Always loved to tackle complex problems, and a great problem solver so to speak. A person with an innovative tech mind , successful working in both team and self-directed settings. Ability to work independently and to learn quickly.

Forward-thinking person with background working productively in dynamic environments. Fluent in Java and Python programming languages and many more. Proud team player focused on achieving project objectives with speed and accuracy.
